EDUCATION

Year	Degree/Exam	Institute	GPA/Marks(%)
2023-Present	B-Tech in Computer Science	Graphic Era University	8.32
2022	12th C.B.S.E	D.A.V Public School	84%
2020	10th C.B.S.E	D.A.V Public School	95%

PROJECTS

- **Automated Malware/Botnet Detection using ML Algorithms**
  - Framework for efficient botnet detection and classification using a combination of statistical techniques and ML algorithms.
  - By analyzing traffic features, the aim is to identify botnets with high accuracy
  - Compare the performance of various metrics such as accuracy, precision, recall and F1-score
  - Ulitmate goal is to identify the most effective approach
- **Airport Runway Management System**
  - A prototype to manage various flights taking off and landing on an airport with multiple runways and terminals.
  - Using dijkastra's algorithm to find the shortest route for the airplane to reach it's designated terminal from the spot where it landed on the airport
- **System Monitor Allocator**
  - This project is a hybrid system utility that combines a standard Linux System Monitor with a highly specialized Dynamic Memory Management Simulator.
  - It effectively functions as a "monitor that monitors itself".
  - System-Wide Resources: Physical RAM, CPU, and Disk usage across the OS.
  - Process-Level Internals: Virtual memory management, block splitting, and merging within the application's own heap.

TECHNICAL SKILLS

Languages : C, C++, Java, Python, C#, React, Node.js

Operating System : Windows, Linux

SKILL-BASED CERTIFICATION

Google Cloud Computing

- Acquired practical experience in deploying and managing scalable applications using GCP services.
- Completed hands-on labs and real-world scenarios through Google Cloud Shell, Quick labs, and the GCP Console.

AWS Cloud Quest & Cloud Practitioner Essentials – Amazon Web Services

- Gained practical experience with AWS services (EC2, S3, IAM) via interactive, gamified labs and scenario-based learning.
- Built a strong foundation in cloud infrastructure, pricing models, security, and core AWS service offerings.
